WHY OUR GMDN MEMBERSHIP MODEL MATTERS

Our newest blog highlights how the GMDN membership model powers safer healthcare worldwide.

With 13,000+ members across 140+ countries, we're ensuring device data stays consistent, trusted, and accessible to everyone who depends on it.

From free access for essential users to premium tools for organisations that need deeper insights, our model keeps the GMDN independent, global, and built for the future of medical technology.

If you want to understand how we're strengthening patient safety and supporting regulators, healthcare providers, manufacturers, and innovators — this is the one to read.

"The GMDN membership model isn't just about access—it's about ensuring that everyone, from local hospitals to global manufacturers, can rely on a consistent, neutral, and clinically meaningful way to describe medical devices.

By keeping access broad, protecting independence, and encouraging global collaboration, we're building a foundation for safer devices, stronger vigilance systems, and better outcomes for patients around the world."

PAUL WADSWORTH,
SENIOR COMMUNICATIONS MANAGER AND MEMBERSHIP RELATIONS LEAD

GMDN AND SNOMED INTERNATIONAL ANNOUNCE STRATEGIC COLLABORATION

SNOMED International and the Global Medical Device Nomenclature (GMDN) Agency have announced a new collaboration aimed at strengthening the connection between clinical and regulatory medical device data to support safer, more efficient, and more interoperable health systems worldwide.

Deniz Bruce, CEO of the GMDN Agency, said: “This collaboration marks an important step forward in strengthening how medical device information is used across global health systems to support interoperability. By working closely with SNOMED International, we are ensuring that clinical and regulatory communities can rely on a more aligned, high-quality source of device data. Our shared goal is to make it easier for healthcare providers, regulators, and industry to work from the same, consistent information—supporting better patient safety, improved traceability, and more effective post-market surveillance worldwide.”
